

ARE YOU GETTING THE MOST OUT OF YOUR THERMAL PRINTHEADS?

TDS & THESE TIPS ARE HERE TO HELP.

MAKE SURE YOU'RE MAKING THE MOST OF YOUR PRINTHEADS

1. Clean your printheads every time you replace a ribbon or paper roll.
2. Verify that you're using the recommended heat and darkness settings.
3. Purchase ribbon that's slightly larger than the print area you intend to cover, to help ensure better printhead lubrication.
4. Keep an eye out for printer and server alerts, and address them quickly whenever they come up.
5. Regularly clear your media, ribbon, and label-available sensors using compressed air.
6. Clean the interior of the printer often, including the platen rollers and your snap plate.
7. Be sure to clean the exterior of the printer regularly as well, and always with a lint-free cloth.
8. Test for burnt-out elements occasionally by running a pause test.

Taking all of the steps listed above will ensure that your printheads function properly and last as long as possible, but they still take time that we know you'd rather spend on your core business. Reach out to us today to learn about our comprehensive, competitive service agreements, and let our nationwide network of expert technicians handle all of the routine maintenance your devices need!

TECHNOLOGY DEPLOYMENT SOLUTIONS

WHY CHOOSE TDS?

What matters to you is what matters most to us

From the industry's most experienced project managers to our 600-strong national network of certified IT design, deployment and installation specialists, your technology infrastructure couldn't be in better hands.

But it isn't just that our people are leaders in a very crowded field, or that our project fees are among the most competitive in the industry. It's that we listen hard, plan obsessively, and care enough about your specifications and deadlines to deliver nothing short of excellence, every time.

Your enterprise depends on it, and our reputation is built on it.

Deeply engaged management

TDS's executive leadership and management teams are multi-disciplinary IT and business management experts with highly successful, tenured careers in the technology deployment industry. All have first-hand experience in the field, and intimate knowledge of the support needs of VARs, Integrators and Enterprises.

As part of a group of companies with roots tracing back to the IT services revolution of the 1990's, TDS has a more sophisticated understanding of the evolution of networks and equipment than your average IT services company. The collective knowledge and experience of our always-accessible leadership team assures partners and clients of highly successful outcomes.

An elite IT workforce is the backbone of TDS

The equipment and technology that make our organizations more efficient and successful couldn't work – let alone exist – if not for the innovative, hard-working and gifted people in our Information Technology industry.

At the heart of TDS are hundreds of the industry's top IT systems designers, staging professionals and certified installation technicians, making our business – and your organization – function at an elite level in a crowded and competitive field.

With dedicated teams on the ground in virtually every local market across all 50 states and Puerto Rico, we can provide wireless and rollout resources on any scale to meet virtually any project deadline.

Call us today to get your project started.
